1. Cut out along the line – the white border is the tape edge.
2. Cover both pieces with wide clear tape (or laminate them) so the squishy is smooth and sturdy.
3. Place front and back together, tape all around the edge and leave about 1 inch open at the bottom.
4. Stuff with cotton, yarn or paper scraps – not too full – and tape the opening shut. Done!

Mini Squishies: Ladybug

DIY Paper Squishy Template · mini version · to color

print at 100%

Cut out one front and one back per mini, cover with tape, tape the edges together and leave a small gap for stuffing.
